

may make covenants or agreements for the purpose of securing the performance thereof, including covenants and agreements relating to the fixing and maintenance of rates and charges for the use of the recreation and park area and the facilities thereof.

The district may use the moneys received under such contract for the construction of sanitation facilities or for any other district purpose authorized by law, or it may pledge all or any part of such moneys to be received to the repayment, both principal and interest, of any indebtedness incurred pursuant to this section. The district may also pledge to the repayment, both principal and interest, of any such indebtedness all or any part of moneys received from sewer service charges imposed by the district and may make covenants and agreements for the purpose of securing such repayment, including covenants and agreements relating to the fixing and maintenance of sewer service charges.

This section shall remain in effect until December 1, 1963, but the termination of the effectiveness of this section shall not affect the validity of any loan, indebtedness, or obligation incurred, or any agreement entered into, pursuant to this section, prior to December 1, 1963.

SEC. 2. This act is an urgency measure necessary for the immediate preservation of the public peace, health or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting such necessity are:

The Cachuma Sanitation District is formed upon the Cachuma Recreation Area, which is located within the watershed of the Cachuma Dam and Reservoir constructed and operated by the Bureau of Reclamation of the United States government to provide domestic water for the southern portion of Santa Barbara County. The ever-increasing use of the park as a recreation area, because of the great demand and pressure for recreation facilities in the heavily populated metropolitan areas of Southern California, has created a health hazard for the County of Santa Barbara in that the recreational use is in the watershed of, and immediately adjoining, the Cachuma Dam and Reservoir, and there are no adequate sanitation facilities to protect the waters of the Cachuma Reservoir from pollution, and the state and county health departments require that adequate sanitation facilities be constructed and installed to prevent pollution of the domestic water supply. The district is located upon federally owned, tax-exempt land and has a small tax base of possessory interest, and the district has few residents, so that an election would be meaningless. The district presently has no funds and it is essential that financing be provided immediately so that a sewer treatment plant and a system of trunklines can be installed as soon as possible to

avert the existing threat to the public health and safety by pollution of the domestic water supply of the southern portion of Santa Barbara County. In order that the district may undertake the immediate financing of the urgently needed sanitation facilities, it is necessary that this act go into immediate effect.
